SYSPRO TO OFFER DASH DOCUMENT MANAGEMENT, DELIVERY SOFTWARE SYSPRO Furthers 'Green ERP' Leadership Via Accord to Supply Dash Cost-Effective, Paper Saving Solution

COSTA MESA, Calif. / Germantown, WI – June 25, 2010 -- SYSPRO, the leading provider of visionary, pragmatic ERP software, has announced that the company will now be offering Dash ddx Document and Delivery Software -- a cost-effective, "green-minded" solution set that enables mid-market manufacturers to gain new cost and time efficiencies while addressing regulatory compliance mandates. The new software continues SYSPRO's leadership in "Green" ERP that provides environmentally friendly options for businesses -- in this case aimed at growth-oriented visionary businesses who want to reduce paper, as well as gain new work flow efficiencies.

The DASH ddx software enables organizations to access, manage and automate the routing of all digital content, including scanned paper documents, e-mails, faxes, print streams, e-forms, Web content and multimedia files. The solution is integrated and embedded into SYSPRO's standard ERP solution set, enabling workers to access and manage these documents directly from the SYSPRO system, thus increasing usability and reducing extra steps.

"The manufacturing sector continues to be pressured by a number of cost and efficiency factors. SYSPRO works closely with our customers to address these problems," said Brian Stein, CEO of SYSPRO USA. "We have always focused on opportunities to automate activities and reduce production schedules, but, increasingly, we are adding new offerings that promote 'green' practices while producing rapid ROI's. Our ability to offer Dash ddx software is yet another step in this direction, making giant strides in helping to save paper and reduce operational costs."

"We are please to be a part of SYSPRO's efforts to bring cost effective solutions manufacturing and distribution companies," said Jim Van Hecke, President of DASH. "This is an area that can quickly generate tremendous savings, even in smaller businesses."

Dash ddx software also provides an inherent document trail that protects and verifies the integrity and security of unstructured documents. Annotations can be added to all documents, and revisions of internal documents can be produced/altered as required. The additional Workflow option
